DOMESTIC COTTON CROP SCENARIO

Cotton arrivals into ginning factories stood at 8.571 million bales as on 15th March, 2020 as reported by Pakistan Cotton Ginner's Association. It indicates a decline of 20.4% over the previous season. Volume of crop both in Punjab and Sindh witnessed decrease by 22.9% to 5.097 million bales and 16.3% to 3.474 million bales, respectively. Better initiatives have been taken by the Federal Government to increase the area of cotton in the next year. To increase the production of cotton, pure seed will be supplied to farmers and complete measures will be taken to combat with pest attack, like white fly and pink boll worm.

For the assessment of indicative cotton price, high level committee has been constituted by the Government to safe guard the interest of farmer, resulting sowing area will be increased by announcement of support price.

ECONOMICS OF COTTON AND COMPETING CROPS

Cotton a Kharif crop, competes with rice, sugarcane and other crops for land, water and other farm resources in the area where the cultivation of all other crops is technically feasible. Mainly cotton faces indirect competition from sugarcane, the annual crop which keeps the land throughout the year. The economics of cotton and competing crops has been analyzed on the basis of inputs-outputs costs paid and received growers during 2016-17 year. The summary of various indicators for Punjab and Sindh are presented in table as under:
